to me

Dear

5:11 PM (12 minutes ago)

I hope this email finds you well. I am writing to provide my feedback on the Frisbeecrew application that you developed. Firstly, I would like to thank you for your effort in creating such a feature-rich and user-friendly platform. The web application meets all the success criteria and the platform is intuitive to navigate, and the design is visually pleasing. In terms of areas for improvement, I believe a function to display the number of likes each post received would be a nice addition. Given the number of likes, the function to sort posts based on their number of likes could be nice: it prioritizes the content that the users are likely to find interesting. Overall, the application is great and I enjoyed using it!

Sincerely,

Yuxuan
